Trading Symbol	BZQ
Intraday Symbol	BZQ.IV
Bloomberg Index Symbol	MXBR
CUSIP	74347X401
Net Assets	\$25.66 million
Gross Expense Ratio ²	3.27%
Net Expense Ratio ³	0.95%

ProShares UltraShort ETFs seek to return twice the inverse of index performance on a daily basis (before fees and expenses)

- Seek profit when markets decline
- Hedge portfolios against market declines
- Track your investment throughout the day
- No margin account

FUND PERFORMANCE AND INDEX HISTORY

ProShares UltraShort MSCI Brazil seeks a return of -200% of the return of an index (target) *for a single day* (before fees and expenses). Due to the compounding of daily returns, returns over periods other than one day will likely differ in amount and possibly direction from the target return for the same period. Investors should monitor holdings consistent with their strategies, as frequently as daily. For more on correlation, leverage and other risks, please read the prospectus.

	1Q 2010	Year to Date	1-Year	3-Year	Since Inception ¹
ProShares UltraShort MSCI Brazil NAV Total Return	-3.96%	-3.96%	—	—	-62.82%
ProShares UltraShort MSCI Brazil Market Price Total Return	-3.58%	-3.58%	—	—	-62.78%
MSCI Brazil Index	0.18%	0.18%	—	—	42.53%

DAILY PERFORMANCE OF BZQ vs. INDEX DURING 1Q 2010⁶

The following scatter graph charts the daily NAV-to-NAV results of the fund against its underlying index return on a daily basis.

DAILY RETURN DURING 1Q 2010

Carefully consider the investment objectives, risks, charges and expenses of ProShares before investing. This and other information can be found in the summary and full prospectus. Read them carefully before investing. Obtain them from your financial adviser or broker/dealer representative or visit proshares.com. ProShares are not suitable for all investors. UltraShort ProShares should lose money when its benchmark index rises.

Past performance does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than they originally cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month-end may be obtained by calling, toll-free, 866.PRO.5125 or visiting proshares.com. Index performance does not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in any index.

¹Since inception returns are cumulative. Market returns are based on the composite closing price and do not represent the returns you would receive if you traded shares at other times. The first trading date is typically several days after the fund inception date. Therefore, NAV is used to calculate market returns prior to the first trade date. ²According to the estimated figure listed in the applicable prospectus. ³Expenses with Contractual Waiver through September 30, 2010. ⁴Correlation is a measure of the strength and direction of a linear relationship between two variables. ⁵Beta is a measure of the slope, which is the steepness of the line drawn through the fund return vs. the benchmark return on a daily basis.

ProShares UltraShort MSCI Brazil

INDEX DESCRIPTION

The MSCI Brazil Index is a free float-adjusted market capitalization-weighted index that is designed to measure the equity market performance of the Brazilian market. To construct the index, every listed security in the market is identified. Securities are free float-adjusted, classified in accordance with the Global Industry Classification Standard (GICS®), and screened by size, liquidity and minimum free float. The index is divided into large- and mid-cap segments and provides exhaustive coverage of these size segments by targeting around 85% of free float-adjusted market capitalization in the Brazilian market.

⁶Because the value of the index is not computed as of the close of the U.S. securities markets due to differences in trading hours between U.S. and foreign markets, correlation to the index will be measured by comparing the daily change in the fund's net asset value per share to the performance of one or more U.S. exchange traded securities or instruments that reflect the values of the securities underlying the index as of the close of the U.S. securities markets. ⁷The quarterly volatility refers to annualized standard deviation, a statistical measure that captures the variation of an index's returns from their mean and that is often used to quantify the risk of the index over a specific time period. The higher the volatility, the more an index's return fluctuates over time.

Investing involves risk, including the possible loss of principal. ProShares entail certain risks, including, in all or some cases, aggressive investment techniques (futures contracts, options, forward contracts, swap agreements and similar instruments), inverse and imperfect correlation, leverage, market price variance and short sale risks. These risks may pose risks different from, or greater than, those associated with a direct investment in the securities underlying the funds' benchmarks, can increase volatility, and may dramatically decrease performance. ProShares are non-diversified and may be more susceptible to single-issuer risk than a more diversified fund. **There is no guarantee that any ProShares ETF will achieve its investment objective.** Please see the prospectus for a more complete description of these risks. Single-country funds typically exhibit higher volatility. International investments may also involve risk from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, and from economic or political instability.

ProShares are distributed by SEI Investments Distribution Co. ProShares may invest in equity securities and/or financial instruments (including derivatives) that, in combination, should have similar daily price return characteristics to the fund's benchmark. Derivative contracts are priced to include the underlying index yield and will not generate dividend income. Because ProShares invest in derivatives and other financial instruments, their dividend distributions may not reflect those of their applicable indexes.

MSCI is a service mark of MSCI. The ETF is not sponsored, endorsed, sold or promoted by MSCI and MSCI makes no representation regarding the advisability of investing in the ETF. 2010-288
