

FACT SHEET As of 12/31/24

PROSHARES EQUITIES FOR RISING RATES

Fund objective

ProShares Equities for Rising Rates ETF seeks investment results, before fees and expenses, that track the performance of the Nasdaq U.S. Large Cap Equities for Rising Rates Index. The goal of the fund is to provide relative outperformance, as compared to traditional U.S. large-cap indexes, such as the S&P 500®, during periods of rising U.S. Treasury interest rates.

Schedule	

Why EQRR ?

- The first U.S. equity ETF specifically designed to outperform traditional U.S. large-cap indexes during periods of rising interest rates.
- Targets sectors that have had the highest correlations to 10-Year U.S. Treasury yields and within those sectors, the stocks that have had a strong tendency to outperform as rates rise.
- Can be used to complement traditional large-cap equity investments.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month-end may be obtained by calling 866.776.5125 or visiting ProShares.com. Index performance does not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in any index.

Carefully consider the investment objectives, risks, charges and expenses of ProShares before investing. This and other information can be found in their summary and full prospectuses. Read them carefully before investing. Obtain them from your financial professional or visit ProShares.com. ProShares are not suitable for all investors.

¹EQRR's total operating expenses are 0.35%. ²Returns are based on the composite closing price and do not represent the returns you would receive if you traded shares at other times. The first trading date is typically several days after the fund inception date. Therefore, NAV is used to calculate market returns prior to the first trade date. ³NAV total returns for the fund are used to calculate Growth of \$10,000. ©2025 FS-2020-2304

Investing involves risk, including the possible loss of principal. The fund is designed to provide relative outperformance, as compared to traditional U.S. large-cap indexes, such as the S&P 500, during periods of rising U.S. Treasury interest rates. As a result, the fund may be more susceptible to underperformance in a falling rate environment. There can be no guarantee that the fund will provide positive returns or outperform other indexes. The fund concentrates its investments in certain sectors. Narrowly focused investments typically exhibit higher volatility. Please see the summary and full prospectuses for a more complete description of risks. **There is no guarantee any ProShares ETF will achieve its investment objective.**
