

## SETH Short Ether ETF

### Why SETH ?

- The fund provides an opportunity to profit when the daily price of ether declines.
- SETH can be bought through a traditional brokerage account.
- Avoid significant costs and fees typically required to short ether.

### Fund Objective

ProShares Short Ether ETF seeks daily investment results, before fees and expenses, that correspond to the inverse (-1x) of the daily performance of the Bloomberg Ethereum Index.

*SETH invests in futures and does not directly short ether. There is no guarantee that the fund will meet its investment objective.*

### Fund Performance and Index History

	1Q 2025	Year to Date	1-Year	3-Year	5-Year	Fund Inception
ProShares Short Ether ETF NAV Total Return	64.04%	64.04%	36.44%	—	—	-26.43%
ProShares Short Ether ETF Market Price Total Return	63.49%	63.49%	36.30%	—	—	-26.46%
Bloomberg Ethereum Index	-45.21%	-45.21%	-48.73%	—	—	0.72%

Periods greater than one year are annualized.

### Daily Return During 1Q 2025

*The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be more or less than the original cost. Shares are bought and sold at market price (not NAV) and are not individually redeemed from the fund. Market price returns are based upon the midpoint of the bid/ask spread at 4 p.m. ET (when NAV is normally determined for most funds) and do not represent the returns you would receive if you traded shares at other times. Your brokerage commissions will reduce returns. Current performance may be lower or higher than the performance quoted.*

*For standardized returns and performance data current to the most recent month end, call 866.776.5125 or visit [ProShares.com](https://proshares.com)*

<sup>1</sup>Expenses with Contractual Waiver through September 30, 2025.

Investors could potentially lose the full value of their investment within a single day.

## Benchmark Description

The Bloomberg Ethereum Index is designed to measure the performance of a single ether traded in USD. The Index is constructed and maintained by Bloomberg Index Services Limited.

## Benchmark Characteristics

Volatility<sup>5</sup> 73.90%

For more information, visit [ProShares.com](https://proshares.com) or ask your financial professional.

## Daily Performance of SETH vs. Benchmark During 1Q 2025

## Fund Holdings<sup>4</sup>

Description	Value	Market Exposure
CME Ether Futures 25/04/2025 DCRJ5	--	-96.3%
CME Micro Ether Futures 25/04/2025 MERJ5	--	-3.8%
Net Other Assets (Liabilities)	\$2,477,018	--
<b>Total</b>	<b>\$2,477,018</b>	<b>-100%</b>

The fund obtains exposure to ethereum through entering into ethereum futures contracts. The assets of the fund are held in cash or invested in short-term cash instruments, including Treasury Bills.

<sup>2</sup>"Correlation" is a measure of the strength and direction of a linear relationship between two variables.

<sup>3</sup>"Beta" is a measure of the slope, which is the steepness of the line drawn through the fund return vs. the benchmark return on a daily basis.

<sup>4</sup>Holdings are subject to change. Sum of weightings may not equal 100% due to rounding.

<sup>5</sup>"Volatility" refers to annualized standard deviation, a statistical measure that captures the variations from the mean of an index's returns and that is often used to quantify the risk of the index over a specific time period. The higher the volatility, the more an index's returns fluctuate over time.

**Investing involves risk, including the possible loss of principal. There is no guarantee any ProShares ETF will achieve its investment objective.**

**This ProShares ETF seeks daily investment results that correspond, before fees and expenses, to -1x the daily performance of its underlying benchmark (the "Daily Target"). While the Fund has a daily investment objective, you may hold Fund shares for longer than one day if you believe it is consistent with your goals and risk tolerance. For any holding period other than a day, your return may be higher or lower than the Daily Target. These differences may be significant. Smaller index gains/losses and higher index volatility contribute to returns worse than the Daily Target. Larger index gains/losses and lower index volatility contribute to returns better than the Daily Target. The more extreme these factors are, the more they occur together, and the longer your holding period while these factors apply, the more your return will tend to deviate. Investors should consider periodically monitoring their geared fund investments in light of their goals and risk tolerance.**

This ETF invests in ether futures contracts and does not invest directly in ether. Ether and ether futures are a relatively new asset class and the market for ether is subject to rapid changes and uncertainty. Ether and ether futures are subject to unique and substantial risks, such as rapid price swings and lack of liquidity, including as a result of changes in the supply of and demand for ether and ether futures contracts. Ether is largely unregulated and may be more susceptible to fraud and manipulation than more regulated investments. The value of an investment in the ETF could decline significantly and without warning, including to zero.

The costs associated with rolling (buying and selling) futures and the impact of margin requirements, collateral requirements and other limits may have a negative impact on performance and prevent the Fund from achieving its objective. The price and performance of ether futures should be expected to differ from the current "spot" prices ether (the prices of ether that can be purchased immediately). These differences could be significant.

This ETF is non-diversified and is subject to risks associated with the use of futures contracts, imperfect benchmark correlation, leverage and market price variance, all of which can increase volatility and decrease performance. The Fund should lose money when the daily price of ether futures rises.

**Carefully consider the investment objectives, risks, charges and expenses of ProShares before investing. This and other information can be found in the summary and full prospectuses. Read them carefully before investing. Obtain them from your financial professional or visit ProShares.com.** Short ProShares should lose value when their benchmarks rise.

Shares of any ETF are generally bought and sold at market price (not NAV) and are not individually redeemed from the fund. Your brokerage commissions will reduce returns.
