Why VERS ?

- The metaverse is an immersive, virtual world where people can work, play and interact.
- The companies shaping the metaverse span sectors and industries, from the production of hardware to social media and gaming platforms.
- VERS offers access to the metaverse ecosystem in a single ETF. The fund tracks a forward-looking index designed to capture the metaverse opportunity as it evolves.

Fund performance and index history¹

	4Q 2024	Year to Date	1-Year	3-Year	5-Year	Fund Inception

Periods greater than one year are annualized.

Growth of \$10,000 since inception²

See reverse for additional information about the fund.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month-end may be obtained by calling 866.776.5125 or visiting ProShares.com. Index performance does not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in any index.

Investing involves risk, including the possible loss of principal. This ProShares ETF is subject to certain risks, including the risk that the fund may not track the performance of the index and that the fund's market price may fluctuate, which may decrease performance. **There is no guarantee any ProShares ETF will achieve its investment objective.**

Investments in metaverse technology are subject to risks associated with a developing industry and there is no guarantee that these companies will be successful. The index theme may not be the primary driver of company, index or fund performance. Companies in the index may have significant unrelated business lines, which could have a significant negative impact on company, index and fund performance. This fund concentrates its investments in certain sectors. Narrowly focused investments typically exhibit higher volatility. Metaverse companies may be subject to cyber-attacks, including but not limited to, unauthorized access to digital systems, data corruption, and service or operational disruption. Cyber-attacks can cause disruptions and impact business operations, potentially resulting in financial losses, the inability of Fund shareholders to transact business, violations of applicable privacy laws and other laws. This fund may be subject to additional risks associated with the semiconductor, software, media and entertainment, and retailing industries. A more complete discussion of risks is found in the prospectus. Investments in non-U.S. securities may involve risks different from U.S. securities, including risks from geographic concentration, differences in valuation and valuation times, unfavorable fluctuations in currency, differences in generally accepted accounting principles, and from economic or political instability. Investments in emerging markets generally are less liquid, more volatile and riskier than investments in more developed markets and are considered to be speculative.

¹ Returns are based on the composite closing price and do not represent the returns you would receive if you traded shares at other times. The first trading date is typically several days after the fund inception date. Therefore, NAV is used to calculate market returns prior to the first trade date. ² NAV total returns for the fund are used to calculate Growth of \$10,000. ©2025 PSA FS-2022-4700422.1
