

SUMMARY PROSPECTUS
OCTOBER 1, 2023

Equities For Rising Rates ETF

This Summary Prospectus is designed to provide investors with key fund information in a clear and concise format. Before you invest, you may want to review the Fund's Full Prospectus, which contains more information about the Fund and its risks. The Fund's Full Prospectus, dated October 1, 2023, and Statement of Additional Information, dated October 1, 2023, and as each hereafter may be supplemented, are incorporated by reference into this Summary Prospectus. All of this information may be obtained at no cost either: online at ProShares.com/resources/prospectus_reports.html; by calling 866-PRO-5125 (866-776-5125); or by sending an email request to info@ProShares.com. The Securities and Exchange Commission has not approved or disapproved these securities or passed upon the adequacy of this Summary Prospectus. Any representation to the contrary is a criminal offense.

EQRR LISTED ON THE NASDAQ STOCK MARKET

Receive investor materials electronically:

Shareholders may sign up for electronic delivery of investor materials. By doing so, you will receive the information faster and help us reduce the impact on the environment of providing these materials. To enroll in electronic delivery,

1. Go to www.icsdelivery.com
2. Select the first letter of your brokerage firm's name.
3. From the list that follows, select your brokerage firm. If your brokerage firm is not listed, electronic delivery may not be available. Please contact your brokerage firm.
4. Complete the information requested, including the e-mail address where you would like to receive notifications for electronic documents.

Your information will be kept confidential and will not be used for any purpose other than electronic delivery. If you change your mind, you can cancel electronic delivery at any time and revert to physical delivery of your materials. Just go to www.icsdelivery.com, perform the first three steps above, and follow the instructions for cancelling electronic delivery. If you have any questions, please contact your brokerage firm.

Investment Objective

ProShares Equities for Rising Rates ETF (the “Fund”) seeks investment results, before fees and expenses, that track the performance of the Nasdaq U.S. Large Cap Equities for Rising Rates Index (the “Index”). The goal of the Index is to provide relative outperformance, as compared to traditional large-cap indexes, during periods of rising U.S. Treasury interest rates (“interest rates”).

Fees and Expenses of the Fund

The table below describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.35%
Other Expenses	<u>0.00%</u>
Total Annual Fund Operating Expenses	<u>0.35%</u>

Example: This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem or hold all of your shares at the end of each period. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your approximate costs would be:

1 Year	3 Years	5 Years	10 Years
\$36	\$113	\$197	\$443

The Fund pays transaction and financing costs associated with the purchase and sale of securities. These costs are not reflected in the table or the example above.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the example above, affect the Fund’s performance. During the most recent fiscal year, the Fund’s annual portfolio turnover rate was 92% of the average value of its portfolio.

Principal Investment Strategies

The Fund invests in financial instruments that ProShare Advisors believes, in combination, should track the performance of the Index.

The Index is constructed and maintained by Nasdaq Inc. (the “Index Provider”). The component securities of the Index are selected by the Index Provider from a universe (the “Universe”) of the 500 largest companies (based on market capitalization) listed on U.S. stock exchanges. The Index consists of 50 companies whose stock prices historically have tended to outperform the Universe during periods of rising interest rates. For these purposes, “interest rates” are 10-year U.S. Treasury yields. On a quarterly basis, the Index selects the five most interest rate sensitive industry sectors in the Universe. A sector’s interest rate sensitivity is based on the correlation of weekly sector performance to weekly percentage changes in 10-year U.S. Treasury yields over the prior three-year period. The highest correlated sector receives a 30% weight in the Index; 2nd highest: 25%; 3rd highest: 20%; 4th highest: 15%; 5th highest: 10%. Within each of these five sectors, 10 stocks are selected for inclusion in the Index. The stocks selected exhibit the strongest correlation of over (and under) performance (compared to the Universe) to increases (and decreases) in 10-year U.S. Treasury yields based on weekly observations over the past three-years. If there are less than 10 stocks in any of the selected large-cap sectors, top-ranked mid-cap stocks are selected until there are 10 securities in each sector. Within each of the five sectors, stocks are equally weighted. The Index is rebalanced quarterly in March, June, September and December. The stocks included in the Index must meet certain capitalization and liquidity requirements. Factors such as the general performance of the U.S. equity market may have a much greater influence on the performance of the Index (and as a result the Fund) than changes in interest rates. While the Index is designed to provide relative outperformance as compared to the Universe during periods of rising interest rates, it is likely to underperform during periods of falling interest rates. The Index historically has been more volatile than an investment in a traditional market-cap weighted large-cap equity index. The Index is published under the Bloomberg ticker symbol “NQERRT”.

Under normal circumstances, the Fund will invest at least 80% of its total assets in component securities of the Index or in instruments with similar economic characteristics.

The Fund will invest principally in the financial instruments listed below.

- **Equity Securities** – Common stock issued by public companies.

ProShare Advisors uses a mathematical approach to investing in which it determines the type, quantity and mix of investment positions that it believes, in combination, the Fund should hold to produce returns consistent with its investment objective. The Fund seeks to remain fully invested at all times in financial instruments that, in combination, provide exposure consistent with the investment objective, without regard to market conditions, trends or direction. The Fund will generally use a “replication strategy” to achieve its investment

objective, meaning that it will invest in all of the component securities of the Index in approximately the same proportion as the Index. However, the Fund may also use a “representative sampling” strategy to invest in or gain exposure to only a representative sample of the securities in the Index or to securities not contained in the Index or in financial instruments, with the intent of obtaining exposure with aggregate characteristics similar to those of the Index. For example, the Fund may utilize a representative sampling strategy when the Advisor believes a replication strategy might be detrimental or disadvantageous to shareholders, such as when buying each security in an Index is impracticable or inefficient, or when there are practical difficulties or additional costs involved in replicating an Index. The Fund also may use representative sampling if the Advisor believes one or more securities in the Index becomes illiquid, unavailable or less liquid, or as a result of legal restrictions or limitations (such as tax diversification requirements) that apply to the Fund.

Please see “Investment Objectives, Principal Investment Strategies and Related Risks” in the Fund’s Prospectus for additional details.

Principal Risks

- **Investment Style Risk** – Market performance tends to be cyclical; certain investment styles may fall in and out of favor. If the market is not favoring the Fund’s investment approach, the Fund’s performance may lag behind other funds using different investment styles. Performance of the Index (and as a result the Fund) could be particularly poor if the equity market declines at the same time that interest rates fall. There is no guarantee that the Index, and accordingly, the Fund, will have positive performance even in environments when the Universe has positive returns and interest rates are rising sharply. The Index historically has been more volatile than an investment in a traditional market-cap weighted large-cap equity index.
- **Equity and Market Risk** – Equity markets are volatile, and the value of equity securities and other instruments correlated with equity markets may fluctuate dramatically from day to day. Equity markets are subject to corporate, political, regulatory, market and economic developments, as well as developments that impact specific economic sectors, industries or segments of the market.
- **Interest Rate Risk** – Interest rate risk is the risk that debt instruments or related financial instruments may fluctuate in value due to changes in interest rates. A wide variety of factors can cause interest rates to fluctuate (e.g., central bank monetary policies, inflation rates, general economic conditions, etc.). Commonly, investments subject to interest rate risk will decrease in value when interest rates rise and increase in value when interest rates decline. A rising interest rate environment may cause the value of debt instruments to decrease and adversely impact the liquidity of debt instruments. Without taking into account other factors, the value of securities with longer maturities typically fluctuates more in response to interest rate changes than securities with shorter maturities. These factors may cause the value of an investment in the Fund to change.
- **Correlation Risk** – A number of factors may affect the Fund’s ability to achieve a high degree of correlation with the Index. Fees, expenses, transaction costs, among other factors, will adversely impact the Fund’s ability to meet its investment objective. In addition, the Fund’s exposure may not be consistent with the Index. For example, the Fund may not have exposure to all of the securities in the Index, its weighting of securities may be different from that of the Index, and it may invest in instruments not included in the Index.
- **Industry Concentration Risk** – The Index may have a significant portion of its value in issuers in an industry or group of industries. The Fund will allocate its investments to approximately the same extent as the Index. As a result, the Fund may be subject to greater market fluctuations than a fund that is more broadly invested across industries. As of May 31, 2023, the Index had a significant portion of its value in the energy, financials, basic materials, and industrial industry groups.
 - **Energy Industry Risk** – Companies in this industry may experience: adverse effects on profitability from changes in worldwide energy prices and exploration, and production spending; adverse effects from changes in exchange rates, government regulation, world events, international conflicts or threat of conflicts and economic conditions; and market, economic and political risks of the countries where energy companies are located or do business. The energy industry has recently experienced significant volatility due to dramatic changes in the prices of energy commodities, and it is possible that such volatility will continue in the future.
 - **Financials Industry Risk** – Companies in this industry may experience: extensive governmental regulation and/or nationalization that affects the scope of their activities, the prices they can charge and the amount of capital they must maintain; adverse effects from increases in interest rates; adverse effects on profitability by loan losses; and severe competition.
 - **Materials Industry Risk** – Companies in this sector may experience: adverse effects from commodity price volatility, exchange rates, import controls and increased competition; supply and demand issues; and risk for environmental damage and product liability claims.
 - **Industrials Industry Risk** – Companies in this industry may experience: adverse effects on stock prices by supply and demand both for their specific product or service and for industrials industry products in general; declining demand; and changing government regulation.
- **Index Performance Risk** – The Index used by the Fund may underperform other asset classes and may underperform

other similar indices. The Index is maintained by a third party provider unaffiliated with the Fund or ProShare Advisors. There can be no guarantee that the Index will perform better in periods of rising rates than other indexes (such as the S&P 500) or investments. Further, there can be no guarantee that the methodology underlying the Index or the daily calculation of the Index will be free from error. The component securities of the Universe differ from the component securities of the S&P 500, which may cause the Index to underperform the S&P 500.

- **Market Price Variance Risk** – Investors buy and sell Fund shares in the secondary market at market prices. Market prices may be different from the NAV per share of the Fund (i.e., the secondary market price may trade at a price greater than NAV (a premium) or less than NAV (a discount)). The market price of the Fund's shares will fluctuate in response to changes in the value of the Fund's holdings, supply and demand for shares and other market factors.
- **Early Close/Late Close/Trading Halt Risk** – An exchange or market may close early, close late or issue trading halts on specific securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses.

Please see "Investment Objectives, Principal Investment Strategies and Related Risks" in the Fund's Prospectus for additional details.

Investment Results

The bar chart below shows how the Fund's investment results have varied from year to year, and the table shows how the Fund's average annual total returns for various periods compare with a broad measure of market performance. This information provides some indication of the risks of investing in the Fund. Past results (before and after taxes) are not predictive of future results. Updated information on the Fund's results can be obtained by visiting the Fund's website (www.proshares.com).

Annual Returns as of December 31

Best Quarter (ended 12/31/2020): 31.21%

Worst Quarter (ended 3/31/2020): -44.89%

Year-to-Date (ended 6/30/2023): -1.55%

Average Annual Total Returns

As of December 31, 2022

	One Year	Five Years	Since Inception	Inception Date
Before Tax	2.39%	4.12%	6.82%	7/24/2017
After Taxes on Distributions	1.79%	3.56%	6.27%	—
After Taxes on Distributions and Sale of Shares	1.79%	3.10%	5.27%	—
Nasdaq U.S. Large Cap Equities for Rising Rates Index ¹	2.71%	4.51%	7.23%	—

¹ Reflects no deduction for fees, expenses or taxes. Adjusted to reflect the reinvestment of dividends paid by issuers in the Index. "Since Inception" returns are calculated from the date the Fund commenced operations, not the date of inception of the Index.

Average annual total returns are shown on a before- and after-tax basis for the Fund. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold shares through tax-deferred arrangements, such as a retirement account. After-tax returns may exceed the return before taxes due to a tax benefit from realizing a capital loss on a sale of shares.

Management

The Fund is advised by ProShare Advisors. Michael Neches, Senior Portfolio Manager, and Devin Sullivan, Portfolio Manager, have jointly and primarily managed the Fund since July 2017 and April 2018, respectively.

Purchase and Sale of Fund Shares

The Fund will issue and redeem shares only to Authorized Participants (typically broker-dealers) in exchange for the deposit or delivery of a basket of assets (securities and/or cash) in large blocks, known as Creation Units. Shares of the Fund may only be purchased and sold by retail investors in secondary market transactions through broker-dealers or other financial intermediaries. Shares of the Fund are listed for trading on a national securities exchange and because shares trade at market prices rather than NAV, shares of the Fund may trade at a price greater than NAV (premium) or less than NAV (discount). In addition to brokerage commissions, investors incur the costs of the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) when buying or selling shares in the secondary market (the "bid-ask spread"). The bid-ask spread varies over time for Fund shares based on trading volume and market liquidity. Recent information, including information about a Fund's NAV, market price, premiums and discounts, and bid-ask

spreads, is included on the Fund's website (www.proshares.com).

Tax Information

Income and capital gains distributions you receive from the Fund generally are subject to federal income taxes and may

also be subject to state and local taxes. The Fund intends to distribute income, if any, quarterly, and capital gains, if any, at least annually.
