Shares of any ETF are generally bought and sold at market price (not NAV) and are not individually redeemed from the fund. Brokerage commissions will reduce returns.

Communication services companies may be subject to the potential obsolescence of products and services, increasing competition, increasing costs and capital requirements, pricing pressures, shifting demographics, and federal and state regulations, which can negatively impact profitability. Companies in the communication services industry may be more susceptible to cybersecurity issues than companies in other industries, including hacking, theft of proprietary or consumer information, and disruptions in service.

Geared (leveraged or short) ProShares ETFs seek returns that are a multiple of (e.g., 2x or -2x) the return of a benchmark (target) *for a single day*, as measured from one NAV calculation to the next. Due to the compounding of daily returns, ProShares' returns over periods other than one day will likely differ in amount and possibly direction from the target return for the same period. These effects may be more pronounced in funds with larger or inverse multiples and in funds with volatile benchmarks. Investors should monitor their holdings as frequently as daily. For more on information on risks, please read the prospectus.

**Investing involves risk, including the possible loss of principal.** Geared ProShares ETFs are non-diversified and entail certain risks, including risk associated with the use of derivatives (swap agreements, futures contracts and similar instruments), imperfect benchmark correlation, leverage and market price variance, all of which can increase volatility and decrease performance. Short ProShares ETFs should lose money when their benchmarks or indexes rise. These funds concentrate their investments in certain sectors. Narrowly focused investments typically exhibit higher volatility. Please see their summary and full prospectuses for a more complete description of risks. **There is no guarantee any ProShares ETF will achieve its investment objective.**
